Dear Mr. [redacted]

Please have the office of security clear the following.

To the Editors  
Life, Time & Life Building  
Rockefeller Center  
New York 20, N.Y.

Sirs:

The picture of the hand held submachine gun the instructor is firing on page 28 Life, April 14 issue, is the U.S. caliber .45 M3 submachine gun. This weapon may readily be converted from caliber .45 to 9MM by substituting a 9MM bolt, barrel, magazine adaptor and 9MM magazine.

The M3 is often mistaken for the improved M3A1 and vice versa. In this picture the identifying point is the short bolt cover assembly with a continuous lip.

Notice that the instructor is firing the weapon left handed.

Thanking you for attention I remain

Very truly yours

P.S.

Please let me know of any ordnance assignments.
